Woodland Engineering Company is a medium sized injection molding facility. Established in 1963, Woodland's beginnings were at the very infancy of Injection Molding. Our knowledge of molding and plastics is unsurpassed in the industry!

At our location in Libertyville, IL. a 16,000 square foot facility we operate 9 injection molding machines, ranging in size from 50 to 500 tons, molding both commodity and engineering resins. Assembly and hot stamping services are also performed at our location. We provide custom molding in addition to servicing our own products.

New tool construction as well as tool repairs are performed "in house" minimizing down time and allowing us to service our customers without interruption.

Stocking programs for the window industry is what has separated WEC from the rest. Servicing both US and International fabricators, our customers benefit from us keeping there lines running.
